Roll No.: 25SCS1003004430

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank Aim Tech Soft Pvt Ltd for providing me the opportunity to undergo this internship and for the guidance and support extended to me throughout the internship period. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

Hi Shubh,

Thank you for interviewing with AimTech soft. We were impressed by your credentials and wanted to offer you a position as a **MIS EXECUTIVE** at AimTech Softwares. Please note the following details pertaining to the internship:

- 1. Location:** Remote
- 2. Start date:** July 1st, 2026
- 3. Duration:** 1 month

For AimTech Softwares

Amit Jain
Director

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the internship undertaken as an MIS Executive at Aim Tech Soft Pvt Ltd, a technology organization operating under the theme of “Experience Certainty.” The internship was carried out remotely from 1 July 2026 to 30 July 2026 as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida. The primary aim of the internship was to bridge the gap between classroom knowledge of data handling and the practical, industry-oriented use of Management Information Systems (MIS) for business decision-making. During the internship, the intern was exposed to real-world MIS practices such as data collection, validation, consolidation, and reporting, along with the use of spreadsheet-based tools and dashboards to convert raw data into meaningful, actionable information for management. On successful completion of the assigned tasks and responsibilities, an Internship Completion Certificate was issued by Aim Tech Soft Pvt Ltd.

4.2 Organization Profile

Aim Tech Soft Pvt Ltd is a technology-driven organization that works on the guiding principle of “Experience Certainty,” focusing on delivering reliable and data-backed solutions to its clients. The organization emphasizes strong internal data governance and reporting practices, using Management Information Systems to track business performance, streamline operations, and support data-driven decision-making across departments. As part of its internship program, Aim Tech Soft Pvt Ltd provides students with hands-on, remote work experience in MIS operations, data management, and reporting.

4.3 Problem Statement

Organizations today generate large volumes of operational data on a daily basis, but this data is only useful when it is accurately collected, organized, and presented in a form that supports timely decision-making. A common challenge faced by growing organizations is the absence of a streamlined process to consolidate scattered data into consistent, error-free reports and dashboards. The problem addressed during this internship was to understand and practically contribute to the process of collecting, cleaning, organizing, and reporting business data, so that it could be used reliably by management for tracking performance and making informed decisions.

4.4 Project Objectives

- To understand the role and importance of Management Information Systems (MIS) in an organization.
- To gain hands-on experience in data collection, data entry, and data validation processes.
- To learn to organize and consolidate data using spreadsheet tools such as MS Excel and Google Sheets.
- To prepare periodic (daily/weekly/monthly) MIS reports for management review.
- To build and maintain dashboards and trackers for monitoring key business metrics.
- To use formulas, pivot tables, and basic automation to reduce manual reporting effort.
- To coordinate with different functional teams for accurate and timely data inputs.
- To apply the above skills on real, assigned MIS tasks during the internship period.

4.5 Scope of the Project

The scope of this internship covers the end-to-end MIS reporting workflow followed within the organization -- starting from the collection of raw operational data, its cleaning and validation, consolidation into structured spreadsheets, and finally its presentation through reports and dashboards for management review. The internship also involved coordinating with concerned teams to resolve data discrepancies and ensure that reports reflected accurate, up-to-date information. The work was carried out entirely in a remote setting using digital collaboration and spreadsheet tools provided by the organization, and did not involve access to any client-facing production system.

4.6 Technologies and Tools Used

- Spreadsheet Tools: MS Excel, Google Sheets (formulas, VLOOKUP/XLOOKUP, Pivot Tables, conditional formatting)
- Data Management: Data cleaning, data validation, and data consolidation techniques
- Reporting & Dashboards: MIS report templates, trackers, and dashboard creation
- Basic Automation: Excel formulas and macros for repetitive reporting tasks
- Communication & Collaboration: Email and messaging tools for coordinating with teams remotely
- Documentation: MS Word/Google Docs for maintaining process notes and reports

4.7 System Architecture

The general workflow followed for MIS reporting during the internship can be summarized in the following stages:

- Data Collection Layer: Raw data is gathered from various internal sources, sheets, and team inputs.
- Data Validation Layer: The collected data is checked for accuracy, completeness, and consistency, and errors are corrected.
- Data Consolidation Layer: Validated data is organized and merged into master spreadsheets using formulas and structured formats.
- Analysis Layer: Pivot tables and formulas are used to summarize the data and identify trends or exceptions.
- Reporting Layer: The analyzed data is presented in the form of periodic MIS reports and trackers.
- Review Layer: Reports are shared with the concerned team/management for review, feedback, and decision-making.

4.8 Methodology

The internship followed a structured methodology combining orientation, hands-on task execution, and periodic review, as summarized below.

Phase	Activity	Description
1	Orientation & Onboarding	Introduction to the organization, its reporting formats, tools used, and the responsibilities of an MIS Executive.
2	Data Collection & Entry	Gathering data from assigned sources and entering it into structured spreadsheet formats.
3	Data Validation & Cleaning	Checking entered data for errors, duplicates, and inconsistencies, and correcting them.
4	Report & Dashboard Preparation	Using formulas and pivot tables to prepare periodic reports and simple dashboards.
5	Coordination & Feedback	Coordinating with the reporting team to resolve data gaps and incorporating feedback into reports.
6	Finalization & Submission	Finalizing reports, ensuring accuracy, and submitting them for review before the internship's completion.

Each phase involved close review of the work completed, and feedback was incorporated on an ongoing basis to improve the accuracy and presentation of the MIS reports prepared during the internship.

4.9 Expected Outcomes

- Practical understanding of the role of MIS in supporting business decision-making.
- Hands-on experience in data collection, validation, and consolidation using spreadsheet tools.
- Ability to independently prepare periodic MIS reports and basic dashboards.
- Improved proficiency in MS Excel/Google Sheets functions such as formulas, pivot tables, and conditional formatting.
- Better understanding of remote coordination and communication with cross-functional teams.
- A completed internship demonstrating readiness to take up entry-level MIS/data reporting responsibilities.

4.10 Certificates of Completion and Communication Proof

The Internship Offer Letter and the Internship Completion Certificate issued by AimTech Soft Pvt Ltd, confirming successful completion of the internship as MIS Executive from 1 July 2026 to 30 July 2026, are attached in Chapter 3 of this report.
